DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claim 20 is rejected under 35 U.S.C. 102(b) as being anticipated by Stuart (US 4,332,169), of record.

3. Re claim 20: '169 discloses a speed nut for a wheel balancer, which teaches (See Fig. 1): A method of mounting a wheel on a wheel balancer comprising a rotatable shaft; centering the wheel relative to the shaft using a centering sleeve (i.e., cone 22) which extends into the center hole of wheel 16; rotating the shaft of the wheel balancer to obtain imbalance data; and after data is obtained, removing the wheel from the balancer while simultaneously dislodging the centering sleeve (cone 22) from the wheel hole.

Allowable Subject Matter

4. Claims 1-19 are allowed.

5. The following is an examiner's statement of reasons for allowance: The present invention is directed to a novel means for locking the centering sleeve to a wheel balancer such that the sleeve remains secured to the balancer upon removal of the wheel.
